EXAMINER

NGUYEN, HOA CAO

ART UNIT

PAPER NUMBER

2841

DATE MAILED: 11/15/2005

Please find below and/or attached an Office communication concerning this application or proceeding.

Office Action Summary	Application No.	Applicant(s)	
	10/759,363	BENSON, BRAD	
	Examiner	Art Unit	
	Hoa C. Nguyen	2841	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 20 October 2005.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-19 is/are pending in the application.
- 4a) Of the above claim(s) 6-19 is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 1-5 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☒ The specification is objected to by the Examiner.
- 10) ☒ The drawing(s) filed on 16 January 2004 is/are: a) ☒ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some * c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
2. ☐ Certified copies of the priority documents have been received in Application No. _____.
3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

DETAILED ACTION

1. Claims 6-19 withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention group, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on 10/20/2005. Claims 1-5 are considered in this Office Action.

Specification

2. The disclosure is objected to because of the following informalities:

Page 1, line 4: The "amongst" must be changed to "among".

Page 12, line 1: There is a reference character 336 (IC) in the specification, but not in the drawings.

Appropriate correction is required.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 1-4 are rejected under 35 U.S.C. 102(b) as being anticipated by Schmidt et al. (US 5729897).

Regarding claim 1, as can be seen in figures 1, 32, and 37, Schmidt et al. disclose a flexible circuit, comprising:

(a) A substrate 2 having at least one opening D, see column 4, lines 11-12 and column 10, lines 14-18;

Art Unit: 2841

(b) an electrical conductor 1 bonded to a first surface of the substrate, see column 4, lines 12-13;

(c) a first cover layer A bonded to the first surface of the substrate and to the electrical conductor; and a second cover layer A' bonded to a second surface of the substrate and to the first cover layer through the at least one opening, see column 10, lines 7-18.

Regarding claim 2, Schmidt et al. disclose the substrate comprises a polymer (polyimide is known as polymer resin, which is commonly used for coating purposes), see column 4, line 14-15.

Regarding claim 3, Schmidt et al. disclose the electrical conductor comprises a metallic conductor (copper foil), see column 4, lines 13-14.

Regarding claim 4, Schmidt et al. disclose the first and second cover layers (A, A') comprise a polymer, see column 9, line 56 continuing column 10, line 6.

Claim Rejections - 35 USC § 103

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

Art Unit: 2841

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

7. Claim 5 is rejected under 35 U.S.C. 103(a) as being unpatentable over Schmidt et al. (US 5729897) further in view of Ames et al. (US 6617518).

Regarding claim 5, Schmidt et al. disclose every limitation as shown in claim 1 above but failed to disclose the at least one opening is located in an environmentally stressed region.

Ames et al., as shown in figure 3, disclose a flexible circuit 10 (flex cable) comprising a flexible substrate 42, an electrical conductor 38 bonded to the first surface of the substrate, see column 6, lines 59-65; and cover layers 54 coated the substrate and the conductor layer, see column 7, lines 19-23.

Ames et al. further disclose that the flex cable is bendable and can be bent into a desired shape or angle, see column 3, lines 22-26; and flap openings or through holes may be formed in the flex cable to enhance its flexibility, which is to prevent stress in the flex cable, see column 5, lines 15-25.

It would have been obvious to one having ordinary skill in the art at the time the invention was made to employ the teachings from Ames et al. to make the at least one opening on the flexible circuit of Schmidt et al. at an environmentally stressed region in order to release stress and to increase flexibility for preventing fracture and break at the bent location.

Citation of Related Art

8. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure:

Walton (US 4098628) discloses a method of laminating a cover layer for flexible circuits.

Kauffman (US 4692566) discloses a ribbon cable.

Tanaka (US 5894409) discloses a sensing element lead wire connecting structure.

Lauffer et al. (US 6204456) disclose a filling open through holes in a multilayer board.

Yang (US 6372992) discloses a circuit protective composites.

Hori (6495764) discloses a shielded flat cable.

Atou (US 6633002) discloses a tape carrier having high flexibility with high density wiring patterns.

Blackwell et al. (US 20020108780) disclose a multilayered laminate.

Lettmann et al. (US 20040031619) disclose a flexible strip cable.

Kumar et al. (US 20050045374) disclose a flexible circuit boards with tooling cutouts for optoelectronic modules.

Conclusion

9. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Hoa C. Nguyen whose telephone number is 571-272-8293. The examiner can normally be reached on M-F.

Art Unit: 2841

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Kammie Cuneo can be reached on 571-272-1957. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
